# Assessment of learning outcomes of a career-learning program - practice

PR4. Training - module 4

Responsible partner: University of Valladolid.

## Practice

The evaluation of a project is as important as the development of the activities themselves. It involves a detailed review of all the actions carried out and the issuing of a justification of the contents and competences acquired.

In order to put into practice what has been learnt, it is time to develop comprehensive training processes.

Using the three activities developed in module 3, we are going to create evaluations using: the theories, types of evaluation, methodology and instruments from the theory.

Remember that for an evaluation to be as complete as possible, you must combine different methodologies and instruments.

### ACTIVITY 1:

<p>How is compliance with the objectives ensured?</p>	
<p>Which theory is most appropriate for this activity?</p>	
<p>What types of evaluation will you use for this process?</p>	
<p>What evaluation techniques will you use for this process?</p>	
<p>Do you think it assesses students holistically: knowledge, skills and attitudes?</p>	

## ACTIVITY 2:

<p>How is compliance with the objectives ensured?</p>	
<p>Which theory is most appropriate for this activity?</p>	
<p>What types of evaluation will you use for this process?</p>	
<p>What evaluation techniques will you use for this process?</p>	
<p>Do you think it assesses students holistically: knowledge, skills and attitudes?</p>	

### **ACTIVITY 3:**

<p>How is compliance with the objectives ensured?</p>	
<p>Which theory is most appropriate for this activity?</p>	
<p>What types of evaluation will you use for this process?</p>	
<p>What evaluation techniques will you use for this process?</p>	
<p>Do you think it assesses students holistically: knowledge, skills and attitudes?</p>
